## Agartala City September 2021 (RO, Kolkata)

### Key Performance Indicators (KPIs):

The following TSPs could not meet the KPIs benchmark as stated below—

**Airtel-** Rx Quality (SINR) in 4G network.

**BSNL-** Drop Call Rate, Call Block Rate, Handover success Rate & Rx Quality in 2G network and Drop Call Rate, Call Block Rate & Rx Quality (Ec/No) in 3G network.

**RJIO-** Drop Call Rate & Rx Quality (SINR) in 4G network.

**VIL-** Rx Quality(Ec/ Io) in 3G and Rx Quality (SINR) in 4G network.

The Operator Assisted Drive Test has been carried out by Regional Office, Kolkata with the help of Service Providers in Agartala City and surrounding area from 9:00 AM to 7:00 PM during 22<sup>nd</sup> Sep. to 23<sup>rd</sup> Sep. 2021. The drive test covered drive route of 210 KMs over a period of 2 days. Approximately 200+ calls were made for each of the 8 networks: three 2G networks, two 3G network and three 4G network covering four TSPs.

# Overview

Agartala is the capital city of the Indian state of Tripura, and is one of the largest cities in northeast India. The city is governed by the Agartala Municipal Corporation.

The test results obtained from these drive tests were utilized to assess the network quality for Voice and Data services in terms of:

**Voice:** Coverage, Quality, Call Setup Success Rate, Drop Call Rate and Block Call Rate.

**Date:** Download Throughputs and Data File Success Rate.

**Video Call:** Video secession disconnection and poor Video quality.

**Voice Tests:** Calls were made for 180 secs duration with wait time of 10 sec between call in all technologies. Three 2G (Lock Mode) networks, two 3G (Lock Mode) networks, Three LTE (Lock Mode) networks covering 4 unique TSPs were tested.

**Data Tests:** Dynamic Data Service Testing was performed along same route in all technologies. 500KB File for 2G, 20MB file for 3G and 40MB file for 4G were downloaded from FTTP server in TSP's own server. Static Data Service Testing was also performed. Three 2G (Lock Mode) networks, Two 3G (Lock Mode) networks, Three LTE (Lock Mode) networks covering 4 unique TSPs were tested.

**Video Call Tests:** A Google meeting link was created for this OADT. All TSPs joined the Google meet link through their Handset and this online meeting was continued throughout the Drive Test. This online meeting was monitored by Advisor and other officials of RO Kolkata.

**TRAI Myspeed App:** Data download, Data Upload, Signal strength, Packet loss and Latency were measured through this App in the different locations on the drive test route.

## **STATIC DATA SERVICE TESTING (on Hotspot)-**

# I. Coverage Details

RF Coverage relates to the geographical footprint within the system that has sufficient RF signal strength to provide for a call session. The Coverage rate is calculated on the basis of % of samples in which the Rx level  $\geq -85$  dBm, RSCP is  $\geq -90$  dBm & RSRP  $\geq -110$ dBm. The details are as follows.

TSP	Coverage Rate %
Airtel 2G	95.45
BSNI 2G	64

## II. Quality Details

For measuring voice quality, as per the QoS norms, RxQual  $\leq 5$  for GSM TSPs, EcNo  $\geq -14$  dBm for 3G TSP sand SINR  $>0$  in case of VoLTE is considered to be good, where as quality beyond this benchmark is considered to be bad. The benchmark should usually be  $\geq 95\%$ .

### VIDEO CALL TESTING --3G & 4G NETWORKS--

**AIRTEL-** The Video call was disconnected one time throughout the drive route and sometimes the Video picture quality was poor on the drive route.

**BSNL-** The Video call was disconnected many times throughout the drive route due to poor coverage/ no signal of 3G.

**RJIO-** - The Video call was disconnected five times throughout the drive route the drive route and sometimes the Video picture quality was poor on the drive route.

**VIL-** The Video call was disconnected five times throughout the drive route the drive route and sometimes the Video picture quality was poor on the drive route.

### •Observations of Regional Office, Kolkata on the Operator Assisted Drive Test and action to be taken by TSPs to improve the QoS-

#### AIRTEL

SINR (83.87%) in 4G network does not meet the benchmarks (95%).

Airtel has been asked to take necessary action including software/ hardware optimization to improve the Rx Quality (SINR), Video calls disconnections and poor coverage/ download throughputs on the drive test routes and at all important locations.

An action taken report is to be submitted by 30.12.2021.

#### BSNL

Call Block Rate (4.36%), Drop Call Rate (10.5%), HOSR (84.1%), Rx Quality (91%) in 2G network and Call Block Rate (6.41%), Drop Call Rate (10%), Ec/No (92%) in 3G network do not meet the benchmarks.

BSNL could not meet Call Block Rate, Drop Call Rate , HOSR , Rx Quality in 2G network and Call Block Rate, Drop Call Rate, Ec/No in 3G network and BSNL has been asked to take necessary action including software/ hardware optimization and installing new sites to improve the KPIs of 2G/ 3G, Video calls disconnections, poor Video quality and poor coverage/ download throughputs on the drive test route and at all important locations.

There was no signal/ very poor coverage of 3G at many locations. For new sites, sharing of other TSPs towers may be possible because it was observed that other TSPs towers are available in the nearby of the locations.

An action taken report is to be submitted by 30.12.2021.

## VI. Observations of RO, Kolkata

### •Observations of Regional Office, Kolkata on the Operator Assisted Drive Test and action to be taken by TSPs to improve the QoS-

#### RJIO

Drop Call Rate (3.49%) and SINR (84.79%) in 4G network do not meet the benchmark.

Average download data speed (4G network- Locked mode) is 6.75 Mbps throughout the drive test route.

RJIO could not meet DCR and SINR benchmark and RJIO has been asked to take necessary action including software/ hardware optimization and installing new sites to improve the DCR and Rx Quality (SINR), Video calls disconnections and poor coverage/ download throughputs on the drive test route and at all important locations.

An action taken report is to be submitted by 30.12.2021.

#### VIL

SINR (84.36%) in 4G network and Ec/No (92.35%) in 3G network do not meet the benchmarks (95%).
